

IN THE CLAIMS AMEND

Claims 1-75. (Deleted)

76. (New) A portable water purifying device, comprising:

- a housing having an opening for receiving water, the opening being positioned to receive the water from an outside source via a gravity feed;
- a filtering component positioned over the opening;
- a sanitizing component positioned within the housing and proximate the filtering component, so as to contact the water received through the opening and the filtering component;
- wherein the sanitizing component comprises an electrochemical cell.
